## COMPUTER NETWORK SETUP

**UNIT CODE:** 0612 451 06A

### Relationship to Occupational Standards

This unit addresses the Unit of Competency: Setup Computer Network

**Unit Duration:** 200 Hours

### Unit Description

This unit covers the competencies required to setup a computer network. It involves setting up computer network, testing computer network connectivity, documenting computer network configurations and conducting computer network user training.

### Summary of Learning Outcomes

LEARNING OUTCOMES	DURATION (HOURS)
1. Setup Computer Network	50
2. Test Computer Network Connectivity	50
3. Document Computer Network Configurations	50
4. Conduct Computer Network User Training	50
<b>TOTAL</b>	<b>200</b>

### Learning Outcomes, Content and Suggested Assessment Methods

Learning Outcome	Content	Suggested Assessment Methods
1. Setup computer network.	1.1 Network Components 1.1.1 Introduction to network components 1.1.2 Examples of network components 1.1.2.1 Router 1.1.2.2 Switch 1.1.2.3 Hub	<ul style="list-style-type: none"><li>Practical test</li><li>Project</li><li>Portfolio of evidence</li><li>Oral questioning</li><li>Interviews</li></ul>

### **Suggested Methods of delivery**

- Role playing
- Viewing of related videos
- Group discussions.
- Instructor led facilitation using active learning strategies.
- Projects.
- Demonstrations.
- Site visits.
